To give him access on Figma is only doable by Monday since the permissions has to be given by our work PC to Ahmed.

We don't work on the weekends.

Other than that Ahmed has still issues with the access, he cannot do certain things such as adding any sort of plugins and stuff.

What's the issue in getting him the admin access? We did it previously and the whole time, we were working so why not now?

It's just one simple thing that is holding us back from moving forward quickly.

Arhamullah Lodhi 08:27 PM

Please try to cooperate Vinny. The reason why I started this again was just to clear out our hearts and gain a long term relation. You have to trust us. Please try to understand 🙏

Vinny Uzor 08:49 PM

I need to know what you guys are doing hence the restrictions. The last time I didnt like the way you were moving because it is my project and you cant hold me to ransom. If he needs to install any plug ins let me know which ones and I will install it for him

Vinny Uzor 08:52 PM

Give me access so I can make new comments on the Figma

Arhamullah Lodhi 09:01 PM

Brother, when did we ransom you for anything?

I thought you thought that.

To clarify we never ransom you for anything.

I have done so many projects here and never ransomed anyone.

So please, be neutral and trust us.

We cannot let you know everything that we are doing out here.

It's like a tutorial then and we cannot.

If you can trust us one last time then I promise to get everything done over the weekend and latest Monday.

Product setup and page, we won't go near that.

To keep you satisfied.

We will just get the other things done.

In the meantime and will touch the product page in the end under your survilence. Sounds good?

Vinny Uzor 09:30 PM

This what I am talking about. The non transparency is worrying like there is some trade secret to it. Mind you just being nice because I already knew the design was f. a theme and i still called you back. I am going to install the

This what I am talking about. The non transparency is worrying like there is some trade secret to it. Mind you I am just being nice because I already knew the design was from a theme and i still called you back. I am going to install the pluggins that come with the theme. If he needs any other pluggins sorry you will need to let me know which

Arhamullah Lodhi 09:31 PM

Okay I will ask Ahmed what plugins he needs to work for and I am also being nice.

If you are thinking of some secrets here, then you really got some time because for us it's just real business.

And we need to earn, the only way to do that is to have this website done smoothly, nothing else.

I don't know who else ransomed you and you are thinking the same for us.

Again, for us it's just another project, we are designers and developers here and nothing else!

Vinny Uzor 11:04 PM

I installed the plugins. Demo data import couldn't import so you'll have upload manually. I enabled import privileges

Arhamullah Lodhi 11:09 PM

Ok

Sunday, Feb 09

Arhamullah Lodhi 07:12 PM

We need plugina to connect CTA's around the page.

Arhamullah Lodhi 07:12 PM

We need plugina to connect CTA's around the page.

We need plugins to make the loadtime quick.

There is like so many things and plugins working on the backend.

You can see here.

Vinny Uzor 10:59 PM

Like I said before send me the name of plugins you need and I will install it. Any that are not needed send me a list and I will uninstall them

Monday, Feb 10

Arhamullah Lodhi 11:06 PM

We need the Elementor Plugin to be installed.

Due to that we would be able to use the theme as drag and drop.

Makes sense?

Vinny Uzor 11:09 PM

Elementor is already installed

Tuesday, Feb 11

Arhamullah Lodhi 07:26 PM

I think Ahmed is saying we can drop the website backup file.

If you are okay giving us the required permissions.

So that you can feel extra safe all the time.

What do you say?

Arhamullah Lodhi 07:49 PM

There is also one more relief we can give, if you can get the Admin access. Just pay us $50 on this new contract. We don't need the other $50. All we need is to get the job done and end it with 5 star rating and feedback along the previous one.

Yesterday

Vinny Uzor 12:03 AM

I am not giving you guys admin access so dont ask me again. If by the end of the day you guys have done nothing I will be cancelling the contract
